AGE 23

GENDER male

OCCUPATION University student

TECH LITERATE

High, understands APIs but finds market confusing.ss

Bio

Alex is curious about the passive income the ai agent promises, he would rather not lose real money so he wants to stress
test the simmer market with paper money until its proven correct (passive income).

Core needs

Needs to test virtual market before real one to make sure of real profit and less money loss
I want full details of trades and how ai thinks, i want to know what strategies he used
I want to set a limit how much ai can spend daily of my money

Frustrations

Scared of the ai agent bugging and not betting properly
Scared of ai agent not using correct strategies
Scared of API disconnecting mid trades
